Stress soothers take center stage at Grand Convention 2009

The timing couldn't be better for the introduction of Young Living's® newest stress-soothing products, as we're in the midst of a challenging season that calls us to be healthy, strong and able to contribute our best.

Four of the six products launched at the Grand Convention are formulated specifically to combat chronic stress, the type of stress that can have a negative impact on our health. They offer relief, improved relaxation and better sleep, all which can help us break out of the chronic stress cycle in which many can find themselves.

Stressed-out statistics

- Stress plays a part in health problems such as headaches, high blood pressure, heart problems, diabetes, skin conditions as well as anxiety and depression. From 75 to 90 percent of all doctor's office visits are for stress-related ailments and complaints.
- The lifetime prevalence of an emotional disorder is more than 50 percent, often due to chronic, untreated stress reactions.

As always, these new products are made with Young Living therapeutic-grade essential oils, so they work WITH our body systems to rebuild and revitalize. They don't mask or suppress symptoms.
